

## Want to know more about Regenerative Agriculture?

Come along for a talk and Q&A session with 3 of Canterbury's top regenerative farming experts, Farmers working with Farmers. Right here in Banks peninsula.

From grazing sheep, cattle farms, dairy and cropping to small scale lifestyle blocks and gardens, hear their stories and ask your questions.

Improving pastures, soil and animal health, reducing inputs, saving money and having more time for a better lifestyle are just some of the benefits found by this system.

*"Farming on Banks Peninsula has often followed regenerative farming principles but we never had a name for the farming we do, or understood how it works. Come and learn how pastoral farming can sequester atmospheric carbon more effectively while increasing farm profits. Let's get ahead of the game before the 2025 management plan takes effect"* Local Farmer Shireen helps.

Presentations by:

**Jono Frew**, Regen Ag coach and mentor, Natural Performance, Leeston

**Sam Lang**, Manager of Quorum Sense, former hill country farmer, Christchurch

**Cornelia Holten**, Regen Ag horticulturist, KoruKai Herb Farm, Pigeon Bay

*These guys are considered the GO TO guys for advice and information on how to adopt and apply these principles to existing farms.*

*Everybody welcome, Koha donation on the day.*

When: 13<sup>th</sup> August 2020

Where: Duvauchelle Hotel  
Banks peninsula

Time: 1.30pm

RSVP to save a front seat. Email us at: [regeneratebankspeninsula@gmail.com](mailto:regeneratebankspeninsula@gmail.com) or simply show up on the day.
